TO WHOMSOEVER IT MAY CONCERN

Ms. **Sonia M** was known to me for two years (2018-2020) as a Postgraduate student in the P.G. Department of Physics at Women's Christian College, Chennai. She is a very sincere, patient and hardworking student who has wide subject interest.

As her professor, I have had an opportunity to observe her participation and interaction in class and to evaluate Sonia's knowledge of the subject matter. She is found to be a persevering student in all respects. She also has a consistent standard of academic record to her credit right from school. Her undergraduate program CGPA was 8.636 and her Master's the CGPA was 8.469.

Sonia has been a member of the Department Newsletter Design & Editorial Board - thereby displaying her leadership skills and willingness to work as a team with her peers. She is a very enthusiastic student who attends online courses, seminars and workshops to augment and update her knowledge.

Concerning research, she has also displayed a very keen interest. Her final year project was a work on 'Quantisation of constrained system: Particle on an N-dimensional sphere' at the Institute of Mathematical Science, Chennai and her internship was on "Theory of cosmic rays" at the Tamilnadu Science and Technology Centre. I have observed the outcome of her work which was found to be very promising. She spends time in updating herself in her field of work and brings her queries with a mindset to understand things better.

Sonia offers support to her peers and believes in the importance of collaborative learning. She is known to involve herself in many extracurricular activities and also has work experience in the field of education as well as information technology.

I understand that she is applying for a PhD program at your esteemed institution. I am happy to recommend her for the same and I wish her success in all her endeavours.
